

Generic Drug Look-up Tool Instructions

Example: Jardiance does not have a generic but a provider may use it because not only does it lower blood sugar, but it also reduces heart attacks, which is a higher risk for diabetic patients than the diabetes itself.

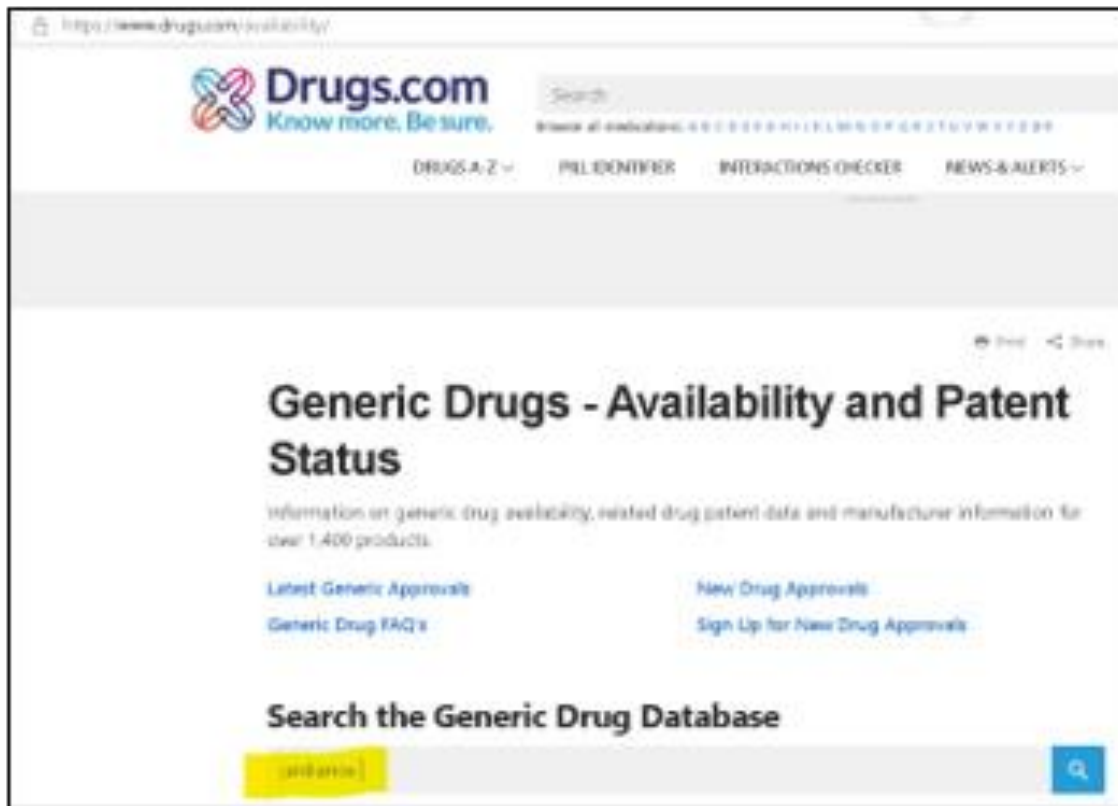

Click on the link and follow the screen shots below, noting the yellow highlighted areas:

<https://www.drugs.com/availability/>

Enter brand name or generic name you want to investigate

Click the search icon (magnifying glass)

A generic paragraph will pop up with the searched drug inserted

Click the 3 dots at end of paragraph

The next screen that pops up will tell you if a generic is available
